Aunt Martha Intervenes. FLORA A. MONTY (Copyright, 1916, by the McClure Newspaper Snydicate)

A ND they do say they came on the same train together!" said Mrs. Prince excitedly, as she wiped her hands on her gingham spron. "Not but that Ray Palmer's done enough things in his life to make as expect anything—even if he is my own nephew—but it does beat all his carrin's on— and him engaged to that little Madge Townes."

"But what difference does it make, Mrs Pilipe it Appele

Mrs. Prince, if Angela did happen to come home at the same time he did, if he didn't know she was comin'?" queried Mrs. Thompson gently, as she half rose from the kitchen chair.

"Well, now, Maria Thompson! What difference would it make to you if your husband come all the way from Salem with Abby Norton? There! I guess you see it now! Well, it's even worse for Ray Palmer to come with that flirty Angels Grow-post-bits see that flirty Angela Grey—prob'bly set-tin' right beside her all the way too. I know that boy and that girl. And ev-en if he is my own nephew, I ain't going' to let Madge break her heart over his goin's on!"

"I call that real good, now. You'll have to hustle, though, if you keep Madge from hearin' it."
"Who's goin' to keep her from hear-

in' it, I'd like to know?" rejoined Mrs. Why, you just said-" faltered her

neighbo "Said I wasn't goin' to have her break her heart over my worthless nephew, and no more I ain't. I'm go-in' right over and tell her now, before

"But, Mrs. Prince, what if that should break 'em up?" Mrs. Thompson's mild blue eyes opened wide in

it's too late."

"Let it! Better now! What's more, I'm goin' to tell Madge ever' last thing Ray Palmer ever done. And I'm go-

in' to take pa and Annie along, too, 'cause they can back me up!"

Mrs. Thompson flutteringly arose with, "Now, ain't you the limit—always lookin' after others."

Well, when others need lookin' after, and ain't got the fool sense to do it themselves, I'm willin' to do my duty, however unpleasant it may be for me." Mrs. Prince followed her departing visitor to the kitchen door and admonished her as she passed down the path: "Now, don't you go and say anythin' to them, Maria Thompson. You know you never get things straight. You just let me tend to them folks, and I'll tend to 'em

Den't fret, Mrs. Prince. I ain't hankerin to get mixed up in that affair," called back Mrs. Thompson, closing her remark with a brisk slam

"H'm! It's ten o'clock!" mused Mrs. Prince, as she turned back to her work "Mobby I better go over to Townes' now, 'thout waitin' for pa and Annia. I can send thom over after dinner." ed away with the determination of a martyr to his country's cause.

Madge was trilling a rollicking song

as her caller reached the back gate.

Mrs. Prince unacountably choked

Mrs. Sniffed. "Humph! She'll sing

til nearly noon when Eliene's maid brought me my coffee and told me my doctor was waiting to see me. I dress-

ed hastily and went out on the sun-

"This is an unexpected pleasure, doctor," I said.
"Well, I wanted to see how my pat tient stood the excitement of fast

'How did you hear about it?"I ask-

"The papers are full of it this morning. I met Mr. Waverly on my way up and he looked none the worst for

his experience. You, however, are not showing the same symptoms of health." His cool fingers felt my pulse

"Oh, doctor, don't send me home," I

said impulsively, then I stopped, for it seemed that I had told him all my secrets. "You see," I explained im-pulsively, "when I go back home I

want to go back with the feeling that I am no longer an invalid."

"You are not physically an invalid any longer," he said decidedly, "but I confess I am not quite satisfied with your mental condition."

"Oh, doctor," I said before I thought how it would sound, "why did you not kill me instead of letting me live?" The doctor smiled indulgently.

"Now we are getting to the root of the matter," he remarked. I am not a naurologist, but I should say you have had a bad case of nervousness complicated by the shock of last night. You should have left the boat last night.

I'll tell your husband to come and get you today."

I burst into tears.

"Here what does this mean," he said kindly. "Oh, doctor, I don't want to g home—and—and, well, I should lik to go home, but I just can't do it."

"That is not very lucid," he answered, "but doctors learn to understand half-reported symptoms. Now I am

going to give you just one more pre-scription, and then if you are not per-fectly well in mind and body after you

have given it a fair trial, I am going to give you up."
"Please don't do that," I implored. I know I must seem like a silly fool to you, docton but I am going to tell.

Aunt Martha!" she welcomed her. "I'm said Mrs. Prince, with an effort to re going to call you 'aunt' now, for Ray says I'll have to after we are married, and I might as well get in practice now.

The greeting was so winsome that for a moment the vigorous old lady was abashed.

"Why, you look all tired out," Madge went on. "Your face is as red as anything! No, I'm not going to let you even talk, yet," as Mrs. Prince at tempted to take charge of the conver-sation. "You sit right down in that big, easy rocker, and use this fan. And I want you to try these dougnnuts.
They're honey doughnuts, like you make you know. Ray copied that recipe for me. Do you remember him asking you how to make them one day last week? He says I've got to learn to cook like you. Of course, And, changing her soiled apron for a learn to cook like you. Of course, stiffly starched clean one, she tramp- I know these aren't as good as those you make, but I'm hoping I'll learn. But Ray says I can't expect to ac-quire your skill in a few months."

"Why-they're-they're good, Madge," she finally managed. "I didn't know Ray Palmer."

The sound of her footsteps on the back porch brought Madge to the door in'. He always—"

"I came over to talk about Ray,"

I saw a peculiar gleam come into the doctor's eyes.

HEALTH HINTS

Many people consider typhoid fever as a non-communicable disease, com-paratively speaking, and think no special methods of prevention are required in its treatment

No more unfortunate idea could be held. The germ that causes the disease is present in the secretions of the patient's body. It is present in the blood the first week and in the in-testinal contents early in the disease. It remains permanently located in the small intestines throughout the long drawn-out stage of fever and in some cases for many months after complete During all this time the patient is

necessarily infective and a source of danger to his attendants and others with whom he may come in contact The typhoid germ readily accomodates itself to outside conditions and

may exist for long periods of time in milk, water, fruits, vegetables and in-fected food, as well as upon plates, cups and other dishes.

It has been shown as the result of

times more frequent in attendants upinvestigations in hospitals and institutions that typhoid fever is many on the disease than among the gen-eral population, the opportunities for contact and infection being present in this instance.

One of the most valuable and effec

tive precautionary measures against the spread of the disease, typhoid vaccination, seldom is carried out among private individuals. Yet it is safe and

No better testimony to the value of typhoid vaccination in preventing ty-phoid fever has been shown than the almost complete absence of the dis-ease among the well typhoid-inoculat-ed troops of the European armies and also in our own army doing duty on the Mexican border.

Comfortable Homes Help.

The better farm home is not a panacea for all ills of dissatisfaction with farm life. There will be farm boys and farm girls who will want to take up other professions than tilling the soil. The problem, says the department of agriculture, is not to force them to stay on the farm, but to make conditions good enough there that they may make an intelligent choice.

A five-year-old boy was joyout
